THE chief characteristic of the present Work is the fulness and completeness of the illustration which it furnishes of the various localities of the Sacred Narrative. It consists of a Series of Maps and Plans which embrace the entire extent of the regions referred to in the Bible, from the Holy Land to the farthest confines of "the East" on the one hand, and to the shores of that ocean which marked the ancient limits of Western discovery on the other. Thus, not only have Canaan and Egypt, Mesopotamia and Chaldea, Armenia and Assyria,—the scenes of the principal events of Sacred

history,—their correspondent delineations in these pages, but those more distant and less known regions (which though only of incidental mention, are yet full of the deepest interest to the reader of the Bible,) as Ethiopia and Arabia, Sheba and Tarshish, have each such geographical illustration as the most erudite and laborious researches have been capable of giving. In like manner, the period of time to which the Maps refer is coincident with the entire extent of history, embraced both in the Old and New Testaments, commencing with the supposed site of the Garden of Eden, and the first dispersion of the families of mankind after the deluge, and terminating with the preaching of the Gospel by the Apostles among the nations of Asia Minor, and the countries of southern Europe.

Palestine itself, the scene of so many wonderful and Sacred events, claims naturally the largest share of illustration, and hence the student is herein supplied, not only with Maps which exhibit successively its condition at different epochs, but also with a separate Map of the territories possessed by each Tribe, on a scale so greatly enlarged as to admit of a minute delineation of the numerous interesting localities of Jewish history. The Reader of the Bible may here trace the wanderings of the early patriarchs of the Hebrew

race, mark the traditional sites of their encampments and dwelling-places, or the hallowed spots in which their remains reposed in death, and note the reputed scenes of the numerous battles and other thrilling events which impart so much of human interest to the inspired records. It is believed that even in the present age of critical (and often of sceptical) inquiry, these qualities will be found to possess sufficient attraction for the simply devotional readers of the Bible, to justify the Publishers in the reissue of a work which thus identifies locally every place mentioned in the Sacred Narrative, and exhibits with topographical precision at least the supposed scenes of the most deeply-impressive events in the history of mankind. In its copiousness of illustration in these regards, the present volume may indeed justly claim to be, not so much an Atlas of Sacred Geography, in the strict sense of the expression, as a *Geographical and Topographical Commentary* upon the entire Scriptures.

The Publishers feel pleasure in drawing attention to the copious Index of words attached to the Work, in which every place mentioned in the Bible is identified by Latitude and Longitude, and referred to the Map in which it will be found. The Classical and Modern Names, where known, are also added, and distinguished by different characters of type, and a reference is given in every in-

stance to one of the texts of Scripture in which the place is mentioned. The care which has been bestowed upon its compilation constitutes this a valuable Appendix to the volume, and will, it is confidently expected, assist in rendering the present Atlas a permanently useful as well as attractive companion to the Biblical student.

## NOTE

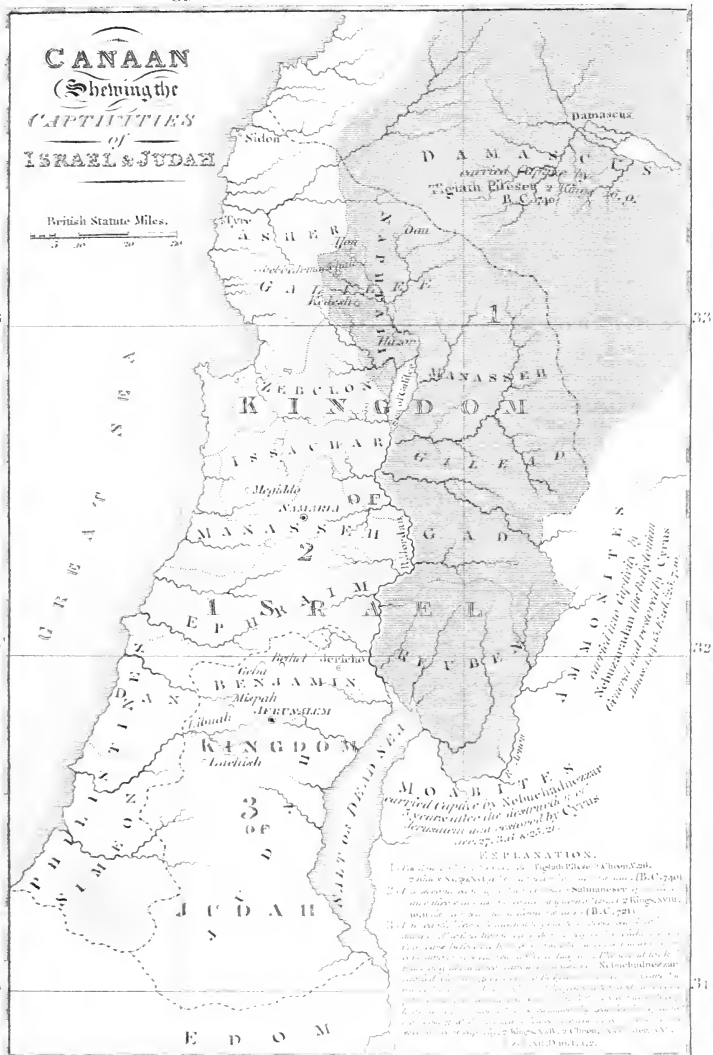

The extreme folly of Balaam's conduct upon his attempting the divorce of Israel (his selfishness) led to the tribes revolt immediately and they chose Jeroboam for their King. Two tribes only namely those of Ephraim and Benjamin remained faithful to Rehoboam. Thus two kingdoms were formed, that under Jeroboam and his successor was called the kingdom of Israel; and that under Rehoboam remained faithful to Rehoboam. The latter was Jerusalem which had been the seat of government since the reign of David's reign. The capital of the former was at Shechem, then Tirzah and afterwards Samaria the principal city, of the tribe of Ephraim where the kingdom is also sometimes called the kingdom of Samaria and sometimes the kingdom of Ephraim.

## NOTE.

Tyre is supposed to have been originally built by a colony of Sidonians (Isaiah 23:2-4) - the Chaldeans the ruins whereof we still remain - by the name of Tyre Tyros or Sidon Tyre. The ruins of Tyre (the Sidonians) of the most ancient and recorded history, for its ruins had been dated the whole of the Sidonians - and though the Sidonians were long victorious, but had nothing but a small city for the ruins. The Sidonians retired to an island about half a mile distant from the shore, and built a new city, which after the destruction of the old city and called by Sidonians as an improvement of Tyre. When Alexander the Great invaded Tyre, he was opposed to the city of Tyre, but he was not able to capture it, and he was forced to retreat. The city of Tyre was not captured until a siege of seven months.
